

VIBRO SIFTER / MULTI MILL SCREEN / TEST SIEVES

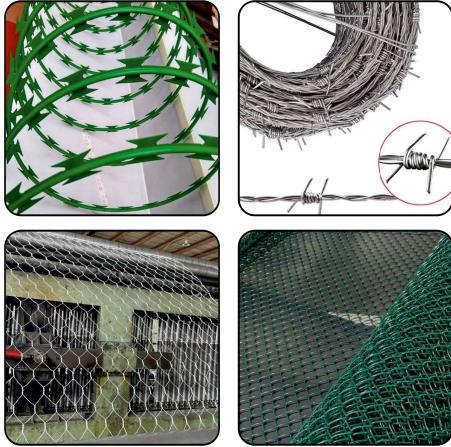

APPLICATION

Used in Chemical Industries, Pharmaceuticals Industries, Dyes Industries, Soil Testing, Cosmetic Industries, Sugar Tea & Coffee Industries, Foundries, Cement Industries, Food Industries.

MATERIAL

SS 316 with Silicon Rubber Food grade bidding

FENCING PRODUCTS

PRODUCTS

Chain Link Fencing / PVC Coated Chain Link / Barbed Wire / Concertina Coil / Razor Wire / Hexagonal Mesh.

MATERIAL

GI Wire, PVC Wire, SS Wire

APPLICATION

Used for Fencing in Gardens, security facilities, Factories, Dairy Farms, Poultry Farms, Dams & Projects, Military Field, Prisons, Detention Houses.

CYLINDRICAL FILTER DISC

FEATURE

Made With Models Through Punching. Can be made into Round, Square, Oval, Bowl & Cap Types. It has Standard Outside Sizes, Precision Filtration and can be Operate Easily.

MATERIAL

Stainless Steel Wire (Grade 202,304, 316, 316L, 310,314), Brass, Copper, Aluminum, Bronze, Titanium.

APPLICATIONS

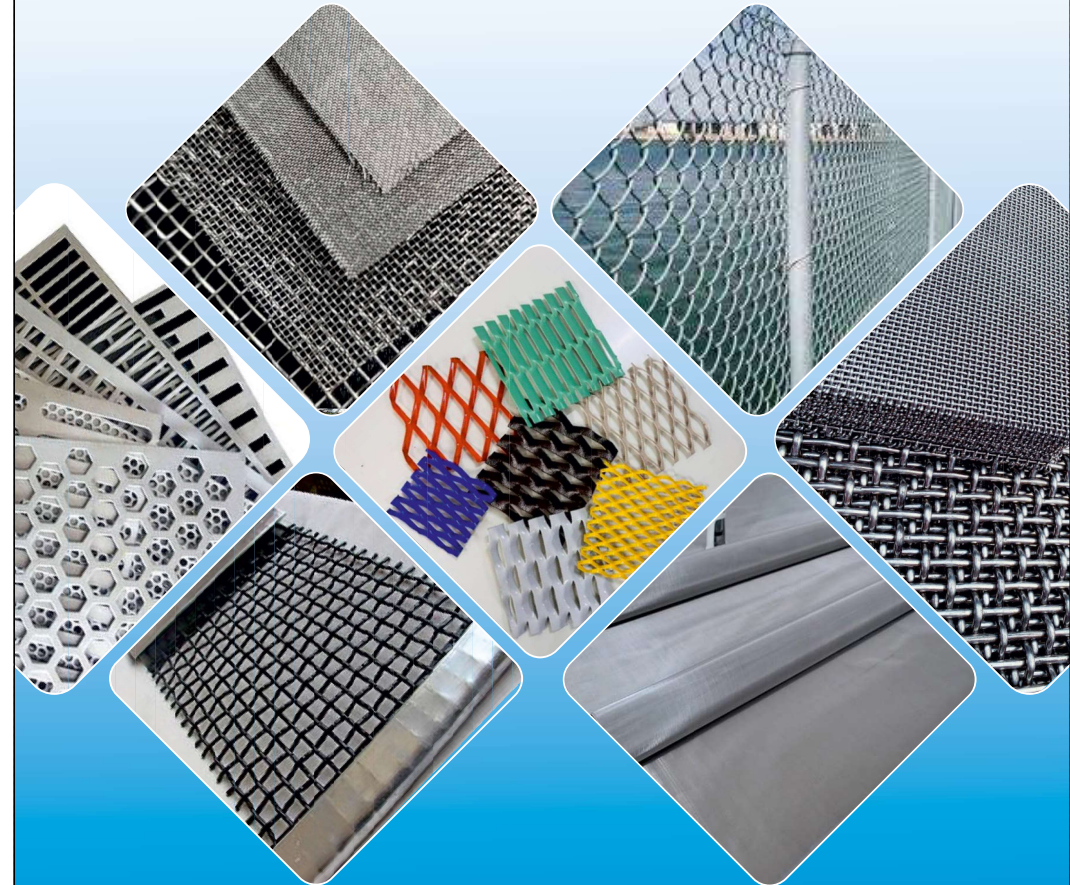

Filter Discs are Widely used in Filtration of Chemical Fibre, Rubber, Medicine Making, Brewery And Filter Machinery.

Since 2007

THE WIRE MESH PEOPLE

OSWAL WIRE MESH CO

The Operational Plans of Oswal Wire Mesh were Implemented in 2007 in Bangalore , Karnataka, and today it has Grown as a Front Runner, Well-reputed, Trusted, Developed and Established Manufacturing Brand, Offering a Wide Range of Wire Mesh, Perforated Sheet Manufacturer and Accessories Made Using Superior Quality Materials as per the Client's Specification.

We are Always B-3 Policy I.e

** Best Quality * Best Service * Best Price*

WIRE MESH

ALL TYPES OF WIRE MESH LIKE

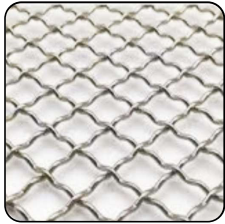

Square Mesh, Rectangular Mesh, Crimped Wire Mesh, Fine Mesh, Woven Mesh, Dutch Wave Mesh, Twill Dutch Wave, And Decorative Mesh

IN ALL METALS

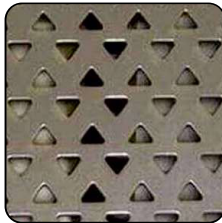

Stainless Steel Wire (Grade 202,304, 316, 316L, 310,314), Brass, Copper, Aluminum, Bronze, Titanium, Inconel, Hastelloy, GI, Super Duplex

APPLICATION

Filters, Mining, Pharmaceuticals, Food Industries, Chemical Industries, Sugar / Rice Mill, Flour Mills, Bakery Equipments, Interior Decorative, Mosquito

PERFORATED METAL SHEETS

PERFORATED METAL SHEETS IN ALL TYPES

Type of Perforated: Round Hole, Square Hole, Oblong Hole, Rectangular, Triangular, Capsule Hole, Hammer Mill, Dimple Screen, Vizar, Interior Decorative Sheets

IN ALL METALS

Stainless Steel Wire (Grade 202,304, 316, 316L, 310,314), Brass, Copper, Aluminum, GI, Super Duplex

WELDED MESH / EXPANDED METAL

WELDED MESH / EXPANDED METAL

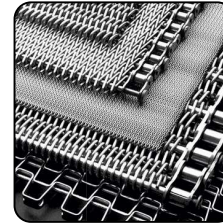

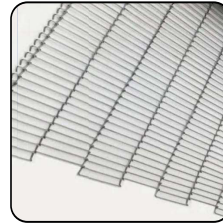

Material MS Black Wire, GI Wire, SS Wire in all Grade, Brass, Copper, Expanded

APPLICATIONS

Used with concrete in buildings and construction, maintenance, of equipments, making of art and crafts, covering screen for class sound case. Also fencing for super highway, studio, highway. Heavy expanded metal can be used as step mesh of oil tanks, walking platform, corridor, and walking road for heavy model equipments, boiler, petroleum and mine well, automobile vehicle, big ships,. Also serve as reinforcing bar in construction, railway and bridge.

WIRE MESH CONVEYOR BELT

WIRE MESH CONVEYOR BELT

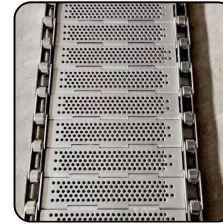

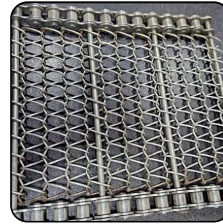

Stainless Steel Wire Mesh, Medium or Low Carbon Steel Wire , Galvanized Iron Wire, Nickel- Chromium Wire, Iron Chromium- Aluminum Wire, Polyester Fiber Etc.

WEAVING AND FEATURES

Common weaving strengthened weaving, sectional common weaving etc.

APPLICATION

Wire Mesh Conveyor belt is widely used in petroleum, metallurgy food machinery, medicine, glass, circuit Panel, Heat Treatment Plant Etc.

SCREEN WIRE CLOTH / VIBRATING SCREEN

MATERIAL

Material Stainless Steel Wire, High Carbon Steel, Spring Steel Wire

APPLICATION

Screening in Mine, Petroleum, Chemical, Fertilizers, Stone Crusher and Food Industry. Used in Screening and Grading of Solid Materials and Filtering of Liquid and Quarry Etc.

KNITTED WIRE MESH/ SOCKS NETT / DEMISTER PAD

MATERIAL

Stainless Steel Wire (Grade 202, 304, 316, 316L, 310,314), Brass, Copper, Aluminum, Bronze, Titanium, Inconel, Hastelloy, GI, Super Duplex

APPLICATION

Demister are utilized in petroleum refining, petrochemical Industry, Gas Industry, Synthetic Chemistry, salt and sugar manufacturing and other chemical industries. They are also employed in packed towers, dust arrestors, and air filters in various enterprises or for chemical – reaction acceleration by painting the filament surfaces with catalyst (in both separation and reaction).
